

About SpringSoft

SpringSoft, Inc. is a global supplier of Electronic Design Automation (EDA) software to the semiconductor and electronic systems industries. The company is the largest in Asia specializing in IC design software. SpringSoft has dual headquarters in Hsinchu, Taiwan, and in San Jose, California and is publically traded on the Taiwan Stock Exchange (TAIEX 2473).

Unique Automation Technologies to Save Time

SpringSoft's unique automation technologies save engineers time at key pain points in the design and verification of complex digital, analog and mixed-signal ICs, ASICs, microprocessors, and SoCs. Our award-winning products comprise two distinct lines: The Novas line of verification enhancement solutions, and the Laker™ line of custom IC design solutions. These solutions share the common characteristic that they automate tedious, time consuming tasks to allow engineers to focus on activities that add value.

Novas Verification Enhancement Solutions

The Novas line is based on unique knowledge-based debug, behavior analysis, essential signal analysis, and data expansion technologies. It includes the industry-leading Automated Debug System (Verdi™) that cuts debug time in half, and the world's only Visibility Automation System (Siloti™) that minimizes simulation overhead. Both products have garnered numerous industry awards.

Laker Custom IC Design Solutions

The Laker line features unique controllable custom layout automation and an advanced Design-Driven Layout flow enabled by our patented MCell™ technology for device manipulation. Automatically leveraging design information from schematics, netlists, physical design rules, and both extracted and user-specified constraints, our controllable automation allows users to craft the highest quality custom layout designs with less effort. These technologies are delivered in the Laker Layout Editor and Laker ADP Analog Design Platform.

SpringSoft Leads the Way

SpringSoft products have been in commercial use for over a decade. Today, thousands of engineers save time using our solutions at semiconductor and systems companies around the world including all of the global top 20 IC Fabless and Integrated Device Manufacturers. We nurture extraordinary relationships with our customers (who voted our Novas verification enhancement line number one in customer satisfaction five years in a row*). In keeping with its mission to deliver specialized EDA solutions with top-rated service, SpringSoft is committed to world-leading customer, employee, and shareholder satisfaction based on integrity and professional excellence. Through the SpringSoft Educational Foundation, SpringSoft extends its impact to the wider community by supporting technology education.
